Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

1. Applicant's amendment received March 3rd, 2005 has been fully considered and entered, but the arguments are not deemed to be persuasive.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-27, and 34-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Van der Schaar et al. (US Patent no. 6788740) for the same

Art Unit: 2613

reasons as previously set forth in the last office action mailed on November 30, 2004.

Regarding the claims above, the applicant argues that Van der Schaar discloses a video encoder that divides video into base layer and enhancement layer and that the invention is not anticipated by the prior art. While the examiner understands the applicant's argument, it must be noted that Van der Schaar does provides an enhancement encoder 250 with a residual calculator 252. The examiner agrees that Van der Schaar does provide a video encoder that divides into base and enhancement layer, however, in addition, there an enhancement encoding unit 250.

The applicant further argues that he/she claims an encoder that quantizes coefficients into quantized values that have an integer part and a fractional part, i.e. real numbers. While the examiner appreciates the applicant emphasis, it should be noted that first, Van der Schaar does generates quantized values. In addition, the base layer is the integer part in Van der Schaar and, the enhancement layer represents the claimed fractional part, i.e., real numbers. (See Van der Schaar col. 8, lines 16-62).

4. Claims 28-33, and 41-44 are rejected under 35 U.S.C. 102(e) as being anticipated by De Bonet et al (US Patent no. 6,510,177) for the same reasons as previously set forth in the last office action mailed on November 30, 2004.

Art Unit: 2613

Regarding Claims 28-33, and 41-44, the applicant argues that De Bonet does not disclose or suggest that the enhancement layer can be decoded into quantized fractional values representing the enhancement layers. The examiner respectfully disagrees since such feature is present in col. 16, lines 50-63. note that De Bonet specifically indicates that "residuals are decompressed using an inverse of a compression format such as the DCT and PWC.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
